# **AIR.Plus**

#### Uniform baking without compromise.

Air is the medium for the heat transmission and therefore the means to bake products. The performance of air flow is fundamental to obtain uniformity of baking in all the points of the single tray and in all the trays.

For this reason the air flow inside the chamber plays a leading role in the design of all **UNOX BakerLux™** ovens.

The **AIR.Plus** technology has been designed by **UNOX** to obtain perfect distribution of the air and heat inside the baking chamber. At the end of the baking foods have a uniform external color and a consistent internal texture.

The **AIR.Plus** technology ensures perfect uniformity within every single pan, on all trays, from the top one to the bottom one.

The possibility to select 2 air flow speeds within the chamber, allows to bake any kind of product, from the lightest and most delicate ones to the ones that require a very high heat transfer.

# **STEAM.Plus**

#### Humidity. Whenever you need it.

To introduce humidity in the chamber in the first minutes of the baking process of leavened products promotes the internal structure development and the browning of the external surface.

It's the amount of humidity that can make a big difference to the final result in terms of consistency and baking time.

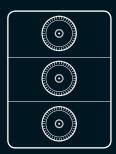

The **STEAM.Plus** technology of the **BakerLux<sup>™</sup>** ovens allows the ability to set the humidity inside the baking chamber from 48 °C to 260 °C to obtain the optimal result from each product.

# **DRY.Plus**

#### Texture and shape. Crunchy outside, soft inside.

In bakery and pastry the presence of excess humidity during the final stages of the baking process can compromise the achievment of the desired result.

The **DRY.Plus** technology expels the humidity from the baking chamber, both the one released by the food and the one eventually generated by **STEAM.Plus** technology in a previous baking step.

With **DRY.Plus** flavors are enhanced, with a consistent result that always lives up to the most demanding expectations.

**DRY.Plus** technology ensures the texture of the baked products, allowing to obtain a dry and well structured internal structure and a crisp and crumbly external surface.

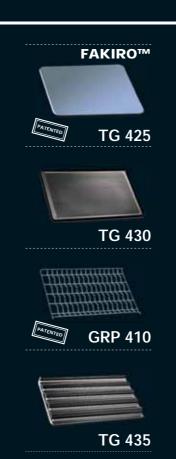

#### Innovative and functional. Essential for your daily production.

Within the **UNOX** research applied to the baking process we could not miss particular attention to accessories and equipment needed to increase the versatility of the oven for your everyday use.

There is a **Baking Essentials** solution for each type of product: from puff pastry to a sponge cake, from biscuits to a cupcake, from croissants to pizzas and leavened products.

The innovative **Baking Essentials** pans and grids allow the ability to deal with all types of baking, otherwise only possible with additional professional equipment, for example traditional pizza ovens or static pastry ovens.

## 600x400 humidity convection ovens

#### **Dynamic** version

		XB 895
Y Et	Capacity	10 600x400
	Pitch	80 mm
	Frequency	50 / 60 Hz
	Voltage	400 V~ 3N
	Electrical power	15,8 kW
	Dimensions WxDxH (mm)	860x900x1277
	Weight	112 Kg

		XB 695	
	Capacity	6 600x400	
	Pitch	80 mm	
	Frequency	50 / 60 Hz	
	Voltage	400 V~ 3N	
	Electrical power	10,5 kW	
	Dimensions WxDxH (mm)	860x900x957	
	Weight	80 Kg	

#### Manual version

		XB 893	
	Capacity	10 600x400	
	Pitch	80 mm	
	Frequency	50 / 60 Hz	
	Voltage	400 V~ 3N	
	Electrical power	15,8 kW	
	Dimensions WxDxH (mm)	860x900x1277	
	Weight	112 Kg	

		XB 693	
	Capacity	6 600x400	
	Pitch	80 mm	
	Frequency	50 / 60 Hz	
	Voltage	400 V~ 3N	
	Electrical power	10,5 kW	
	Dimensions WxDxH (mm)	860x900x957	
	Weight	80 Kg

#### Complementary equipments & Accessories

Hood with steam condenser Digitally controlled only by Dynamic ovens Voltage: 230 V ~ 1N Frequency: 50 / 60 Hz Electrical power: 200 W Exhaust chimney diameter: 121 mm Min. air flow: 550 m3/h Max. air flow: 750 m3/h Dimensions: 860x1028x297 WxDxH mm Art.: XC 415

#### Art.: XC 4

Proofer Digitally controlled only by Dynamic ovens Capacity: 12 600x400 Pitch: 75 mm - Voltage: 230 V~ 1N Frequency: 50 / 60 Hz Electrical power: 2,4 kW Max. Temperaure: 50 °C Dimensions: 862x910x727 WxDxH mm Weight: 38 Kg Art.: XL 415

#### Proofer with manual control Capacity: 12 600x400 Pitch: 75 mm - Voltage: 230 V~ 1N Frequency: 50 / 60 Hz - Electrical power: 2,4 kW Max. Temperaure: 50 °C Dimensions: 862x910x727 WxDxH mm

Weight: 38 Kg Art.: XL 413

Neutral cabnet Capacity: 7 600x400 Pitch: 57 mm Dimensions: 860x636x780 WxDxH mm Weight: 27 Kg Art.: XR 258

High open stand Dimensions: 844x665x672 WxDxH mm Weight: 9 Kg Art.: XR 167

Lateral support - kit for stand For model: XR 167 Capacity: 7 600x400 Pitch: 60 mm Weight: 4 Kg Art.: XR 728

Wheels H: 105 mm 4 wheels complete kit: 2 wheels with bake - 2 wheels without brake. Art.: XR 621

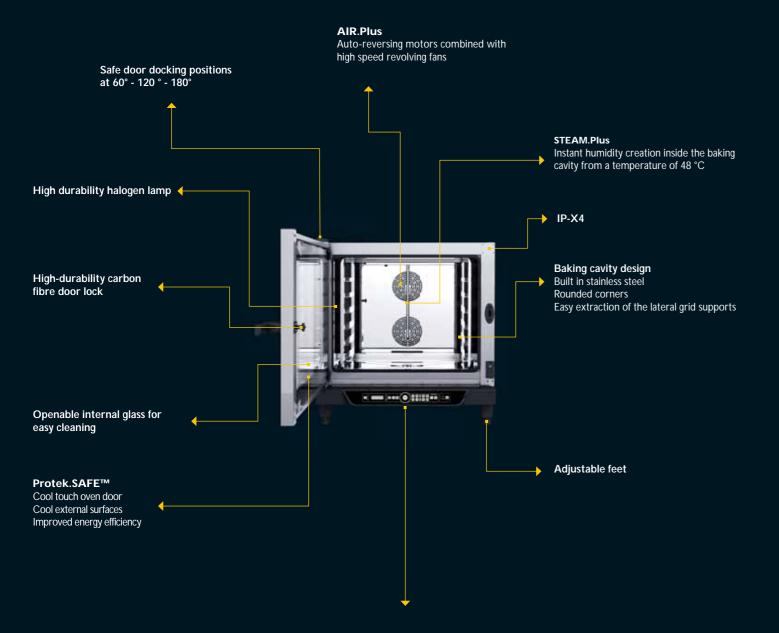

Shower kit

Art.: XC 202

## **Technical details**

### Features

#### **Dynamic** and **Manual**. Each control panel is customized and designed for a quick and easy use of the oven.

Standard	Optional	<ul> <li>Not available</li> </ul>	
BAKING MO	DES		
Convection b	oaking 30 °C - 260 °C	;	
Convection of	cooking + Humidity	48 °C a 260 °C
